

FANUC ARC Mate 100iC/12

- hanging scaffolding suitable for rotating the mounted robot arm 270 ° with 7-axis expansion and drive system
- workpiece rotating machine: 2dbL-shaped, 2-axis rotor with 1000 kg rotary load
- PLC control
- electrical cabinet
- HMI

The cell does not contain any welding equipment, but a possible welding device can be solved.

The robot arm is compatible with any welding equipment that communicates via Ethernet.
