

<b>Specification</b>	
Exploitation method	4 columns electrohydraulic press
Guides of sliding	polished (42 Cr Mo V4)
Power of the press	200 t, 250 Bar
Travel of the press	600mm
Positioning	Even adjustment
Slider (annealed by eliminating internal tension)	Guide bushings together with the guide bands
Table area	1800x1400 mm with T-slots
Slider area	Width: 1400 mm; depth: 1000 mm
<i>Maximally possible height</i>	800mm
<i>Distance between the columns</i>	1400mm
<i>Distance between the columns in the depth</i>	1000mm
Exploitation power	30KW
Fast travel	9,8 mm/s
Table together with the T-shaped notches	Tightened up to the press foundation
Slider of the press	Construction with the T-shaped notches
Control	Two hands control
Actuator	Gearwheel pump
Hydraulic control	Cartridge type construction
Hydraulic components	According to the IEC standards
Hydraulic tightening	Tightening with the help of beside-forming connections
Exploitation tension	400 V AC
Fully electromotorised performance	VDE reikalavimai
Joystick one hand control	Even speed adjustment 3-10 mm
